-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1-4 and 22-23 are, drawn to a method containing steps of detecting a relative difference in feed distance and synchronizing operating speed responsive to the detected relative difference in feed distance, classified in class 83, subclass 367.
- Group II. Claims 5-6, 13-15, and 24-27 are, drawn to a method containing steps of detecting distance between the web and the guide member to determine presence of excess web and adjusting operating speed responsive to the detected distance between the web and the guide member to reduce the presence of excess web, classified in class 83, subclass 403.1.
- Group III. Claims 16-21 are, drawn to a method containing steps of detecting a difference in delivery status and briefly disengaging at least one drive wheel to enable one or more of a) realignment and b) adjustment and spacing of the web, classified in class 83, subclass 63.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has

separate utility such as a method not requiring steps set forth in groups II-III, invention of group II has separate utility such as a method not requiring steps set forth in groups I and III, and invention of group III has separate utility such as a method not requiring steps set forth in groups I-II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Thursday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
